TITLE : RECEIVER AND TRANSMITTER FOR
MULTIPLEX INFORMATION

ABSTRACT : PURPOSE: To obtain a multiplex information receiver which selectively records only the desired audio information and a multiplex information transmitter.

CONSTITUTION: Based on the menu data beforehand transmitted as multiplex information, desired music titles are successively specified and corresponding retrieval starting time, retrieval stopping time, names of the broadcasting stations, music names and recording time are stored in a retrieval data memory 6. When a retrieval starting time is detected, the corresponding receiving broadcasting station is set. If the music title information transmitted as complementary information of the audio information matches with the music title in the memory 6, a recording of the music is executed by the recording time in the memory 6.
